

Click on the Quiz and then from the quiz admin gear – click on edit settings

In the layout section – click on Show more and you will see where you can change it to sequential. You may want to give the students a heads up – again.

In the question behavior section – you can turn off the “shuffle within questions” this turns it off for the whole quiz/test. You can turn it off in the individual questions in the question bank.

The image shows a screenshot of a quiz settings interface. At the top, the 'Grading method' is set to 'Highest grade'. Below this, the 'Layout' section is expanded, showing 'New page' set to 'Every question' with a 'Repaginate now' checkbox, and 'Navigation method' set to 'Sequential'. A 'Show less...' link is visible below the layout section. The 'Question behaviour' section is also expanded, showing 'Shuffle within questions' set to 'Yes' and 'How questions behave' set to 'Deferred feedback'. Each setting has a help icon (question mark) and a dropdown arrow.

Grading method	?	Highest grade
Layout		
New page	?	Every question <input type="checkbox"/> Repaginate now
Navigation method	! ?	Sequential
Show less...		
Question behaviour		
Shuffle within questions	?	Yes
How questions behave	?	Deferred feedback
